KANSAS BWM SFY 2010 Waste Tire Grant Program Playground Surfacing/Waste Tire Products

Vendor/Product Eligibility Application Form

*The SFY 2010 Kansas waste tire grants Announced February 1, 2009 will emphasize the purchase of playground cover material and other waste tire-derived products. **For products to be eligible for reimbursement with grant funds the Manufacturer or Distributor must be placed on the approved vendor list prior to grant awards. (Don't delay! Applicants will be looking for this list to make their decisions.)***

- **The Manufacturer or Distributor must submit ASTM testing; certifications; warranties; and Kansas tire history reports to KDHE to be placed on the approved vendor list. If you have not done so previously, or if your product name has changed, please submit these now. If you have new test results, or changes to your warranty, etc, also please submit these now.**
- 2008 annual reports showing tonnage of Kansas Waste tires processed at the manufacturing facility ARE NOW DUE, and will be requested again in the future.
- Playground Surfaces must be tested to ASTM 1292-04 (Head Impact - critical fall height)
- Playground surfaces that meet the ADA recommendations will be given preference over projects that do not.
- A final certification statement that the product is the same as on the approved list, and that it was installed according to manufacturers guidelines and to fall height standards will again be required for final payment of grant funds.

GENERAL INFORMATION

1. Warranties applying to the functionality, coating, color, wire-free status, etc. are to be filed with KDHE Waste Management Grants Program along with this 2-page application.
2. Waste tire derived products composed of multiple materials must be no less than 50% waste tire material by weight, **unless composed of other recycled material. Partial funding may be available for products with tire content less than 50%.**
3. Playground Surfaces must also be tested to ASTM F1951 to claim accessibility. (Standard Specification for Determination of Accessibility to Surface Systems Under and Around Playground Equipment.) – **THEY DO NOT HAVE TO PASS TO BE ELIGIBLE.**
4. Materials and Installation of Playground Surfacing must conform to Consumer Product Safety Commission guidelines for Public Playground Safety (Publication 325).
5. Installations of non-coated, all-black playground surfacing material will be required to have signage to warn users of the temperature hazards in Kansas. (Coating and coloring recommended)
6. The product supplier will be responsible for any installation training or guidance.
7. KDHE SFY 2009 Waste Tire Management Grants will not pay for **salaries, labor to install loose fill, planning, design, drainage, base preparation, or other surfacing (not made from waste tires)**; but these costs may be used towards the 50% matching funds with prior approval.

This page intentionally left blank for double-sided printing of form.

Playground Surfacing/Waste Tire Products

SFY 2010 Waste Tire Grant Program

Waste Tire Derived Product Certification

Due to the difficulty in evaluating larger or complex projects, please provide as much information as possible for the file. The committee must be able to quickly evaluate the environmental or health benefits of such projects.
